Data Science / Machine Learning Competition

Machine Learning is getting more and more important in academia and in the industry. Nobody wants to be left behind (including us).

In this thesis we want to enter a data science competition¹ and see how well we can do. If this sounds interesting to you, do not hesitate to contact us so we can have a chat. Which exact competition we enter depends on what is currently open and on your personal interests.

Remarks: Creativity and programming skills are an advantage. Some experience with Machine Learning and possibly Deep Learning is required. There will be weekly meetings with your supervisors to discuss progress and open problems.

Interested? Please contact us for more details!
